RESEARCH REPORT

RESEARCH REPORT

1. The first part of the report describes the synthesis of a new compound, which is a derivative of the well-known compound,  $\text{C}_6\text{H}_6$ . The synthesis was carried out by the reaction of  $\text{C}_6\text{H}_6$  with  $\text{C}_6\text{H}_5\text{Cl}$  in the presence of a catalyst. The product was purified by distillation and its boiling point was found to be  $100^\circ\text{C}$ . The molecular weight was determined by mass spectrometry and was found to be 120. The compound was identified as  $\text{C}_{12}\text{H}_{10}$  by comparing its infrared spectrum with that of the known compound.

2. The second part of the report describes the properties of the compound. It is a colorless liquid with a boiling point of  $100^\circ\text{C}$ . It is soluble in organic solvents and its refractive index is 1.45. The compound is stable at room temperature and does not react with water or acids.

3. The third part of the report describes the synthesis of a new compound, which is a derivative of the well-known compound,  $\text{C}_6\text{H}_6$ . The synthesis was carried out by the reaction of  $\text{C}_6\text{H}_6$  with  $\text{C}_6\text{H}_5\text{Cl}$  in the presence of a catalyst. The product was purified by distillation and its boiling point was found to be  $100^\circ\text{C}$ . The molecular weight was determined by mass spectrometry and was found to be 120. The compound was identified as  $\text{C}_{12}\text{H}_{10}$  by comparing its infrared spectrum with that of the known compound.
